ASSIGNMENT 2 **MANISHA M**
240701304

Insurance Claim Request Form – Advanced Fields Use Case

Aim

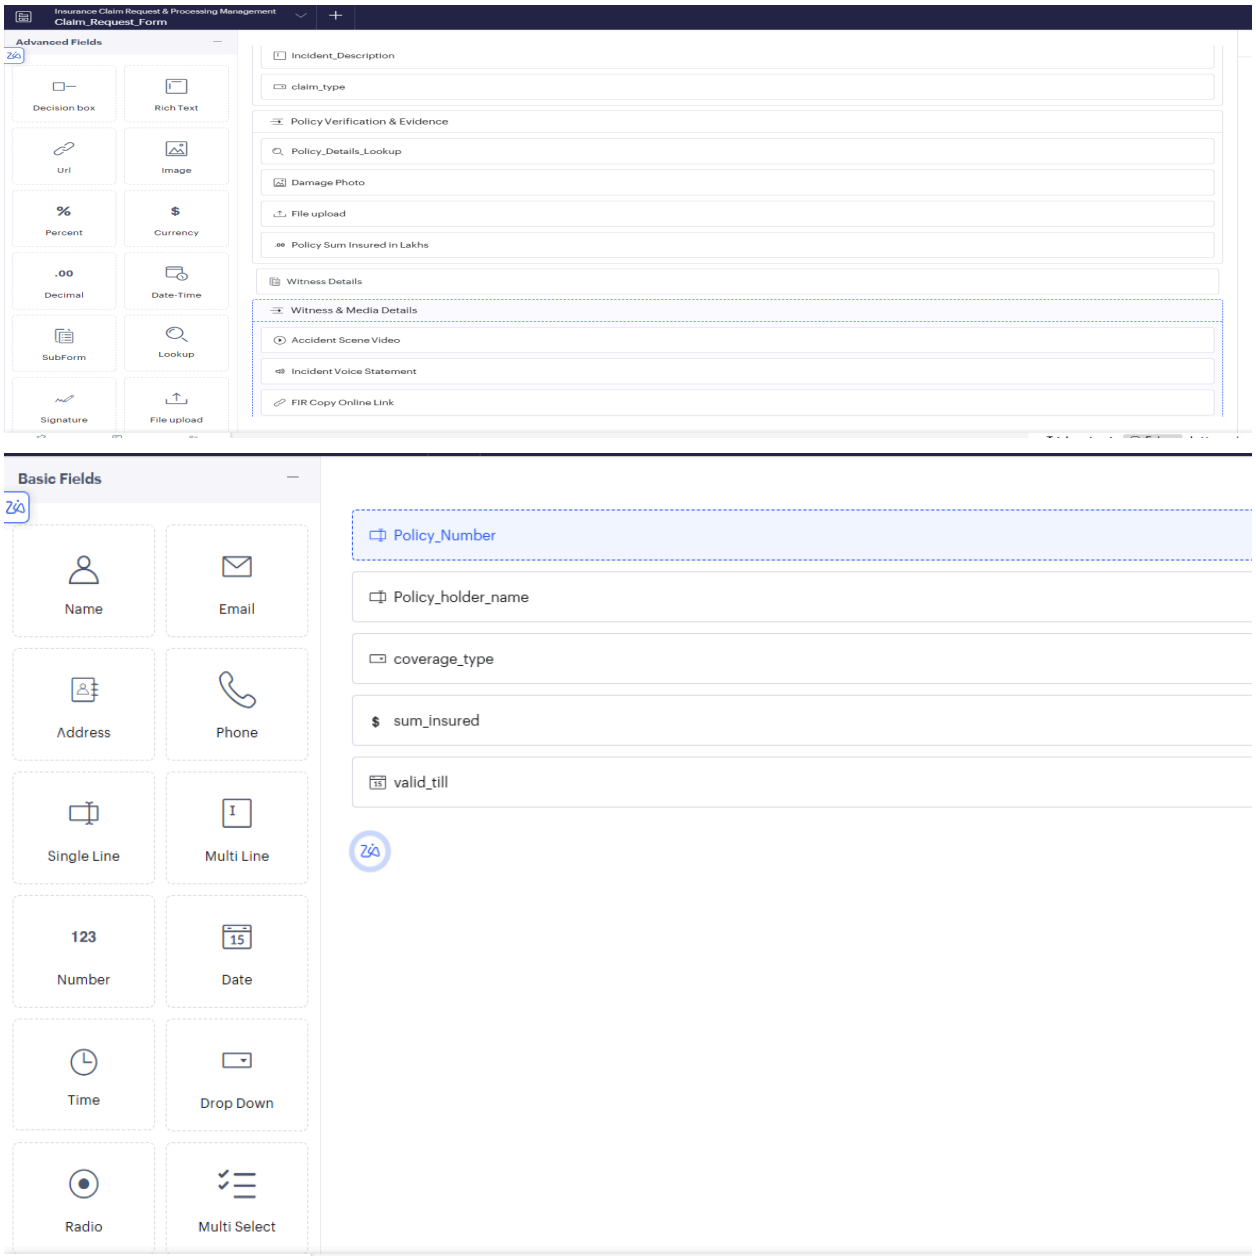

To create an Insurance Claim Request & Processing Management application in Zoho Creator by extending the Claim_Request_Form with advanced fields for policy verification, witness details, evidence/media upload, settlement calculation, digital signature, automatic claim reference generation, and QR-code-based claim tracking.

Procedure

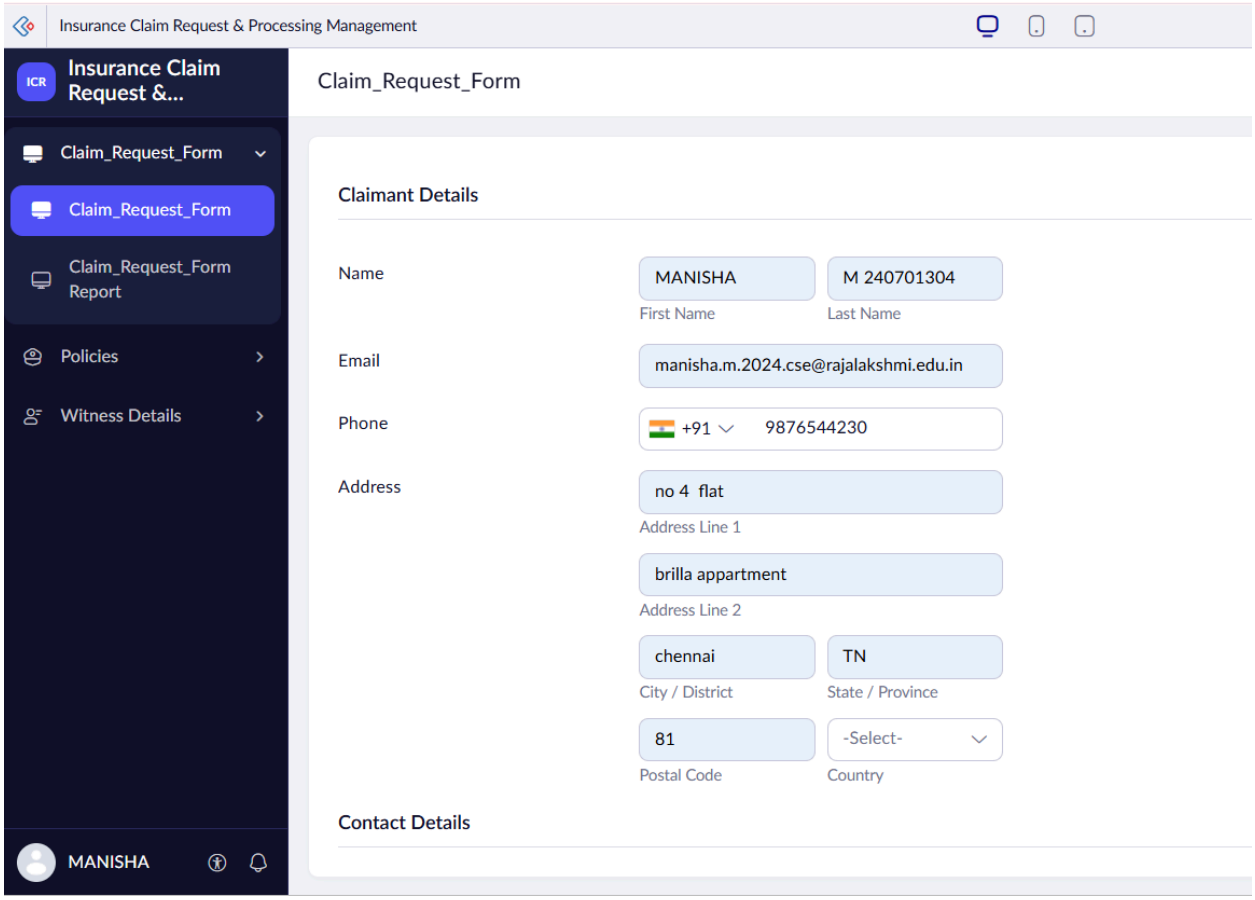

1. Create a Zoho Creator application named Insurance Claim Request & Processing Management.
2. Create the Claim_Request_Form with basic claimant, contact, and claim details.
3. Create a Policies master form containing Policy Number, Policy Holder Name, Coverage Type, Sum Insured, and Valid Till.
4. Add a Policy Details Lookup to connect the claim form with the Policies form.
5. Create the Policy Verification & Evidence section and add:
    - Policy Details Lookup
    - Damage Photo
    - Repair Estimate Upload
    - Policy Sum Insured in Lakhs
6. Create the Witness & Media Details section and add:
    - Witness Details SubForm
    - FIR Copy Online Link
    - Accident Scene Video
    - Incident Voice Statement
7. Create the Settlement Computation section and add:
    - Is Third Party Involved
    - Estimated Repair Cost
    - Depreciation Percent
    - Net Payable Amount
8. Configure the Formula field to calculate the net payable amount using repair cost, depreciation, and policy deductible.
9. Create the Declaration & System-Generated Values section and add:
    - Claim Process Guidelines Display
    - Claimant Digital Signature

    - Claim Submitted On
    - Claim Reference ID
    - Claim Tracking QR Code
10. Configure the required validations for image, file, video, percentage, currency, and witness fields.
11. Configure the Auto Number field to generate a unique claim reference and configure the QR/Barcode field to encode the claim reference.
12. Test the completed form by entering sample claim details, adding witness records, uploading supporting files, checking the calculated Net Payable Amount, signing the declaration, and submitting the claim.
13. Verify the generated Claim Reference ID and QR Code in the Claim_Request_Report.
14. Submit at least two sample claims and verify that the generated values appear correctly in the report.

Result

The Insurance Claim Request & Processing Management application was successfully created in Zoho Creator with the required Advanced Fields. Policy details can be verified through the Lookup, witness and supporting evidence can be captured, the net payable amount can be calculated automatically, and unique claim references and QR codes can be generated for claim tracking.
