ASSIGNMENT 4 **MANISHA M**
240701304

Insurance Claim Dashboard Using Zoho Creator Page Builder

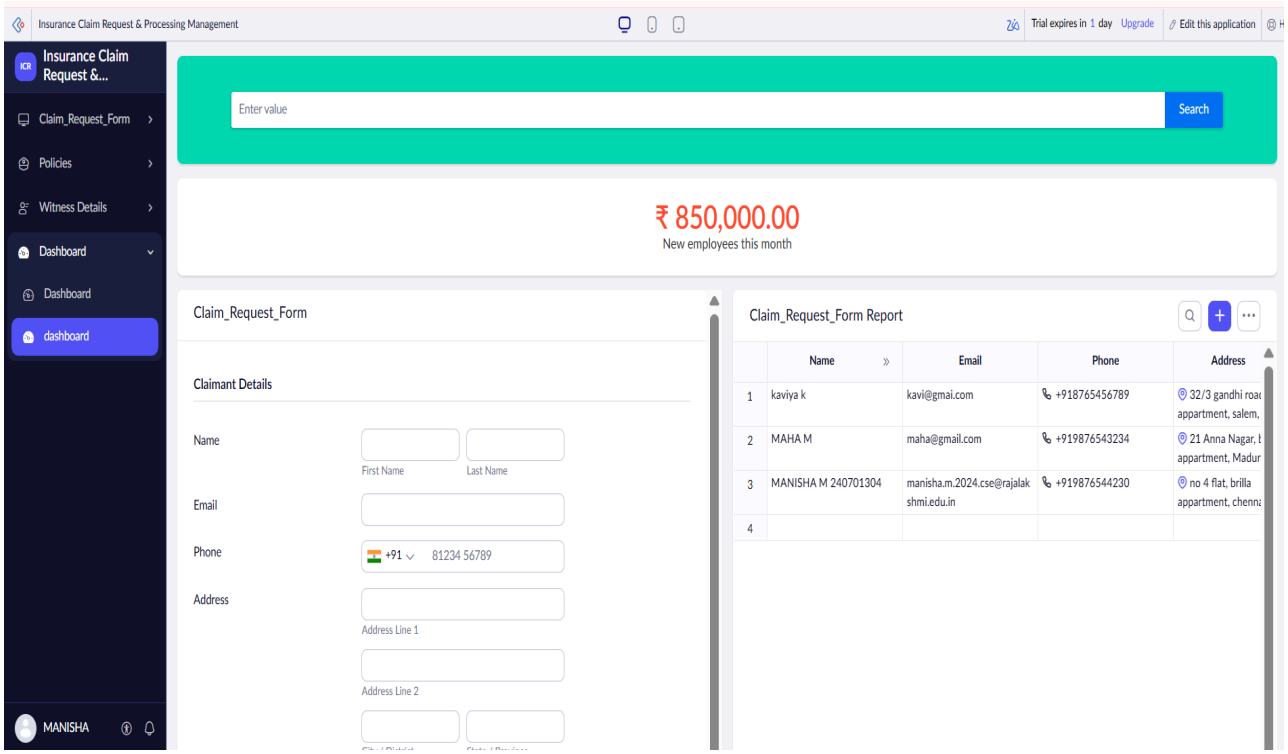

Aim

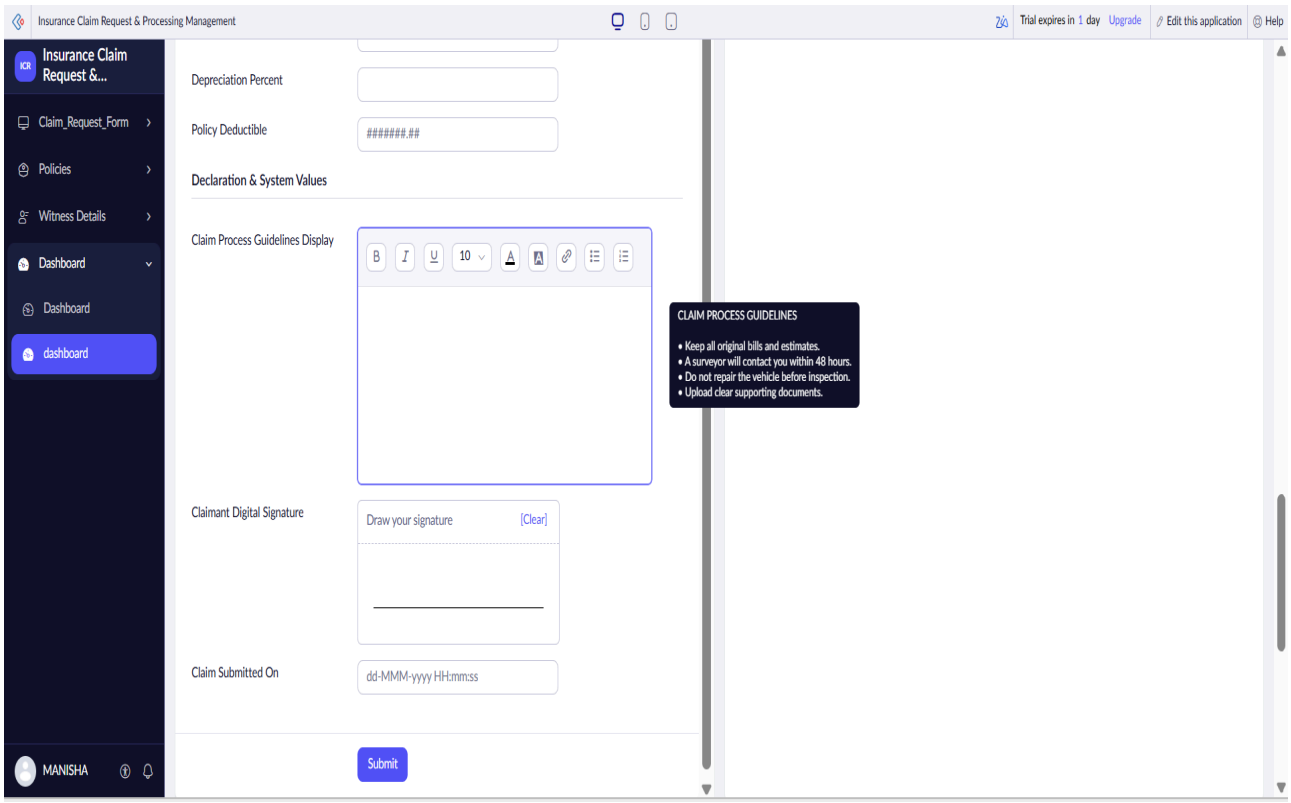

To design and build an dashboard in Zoho Creator using all eleven Page Builder elements—Panel, Board, Chart, Gauge, Search, Form, Report, Snippets, Button, Widgets, and Viewer—to provide a unified workspace for monitoring, processing, and managing insurance claims.

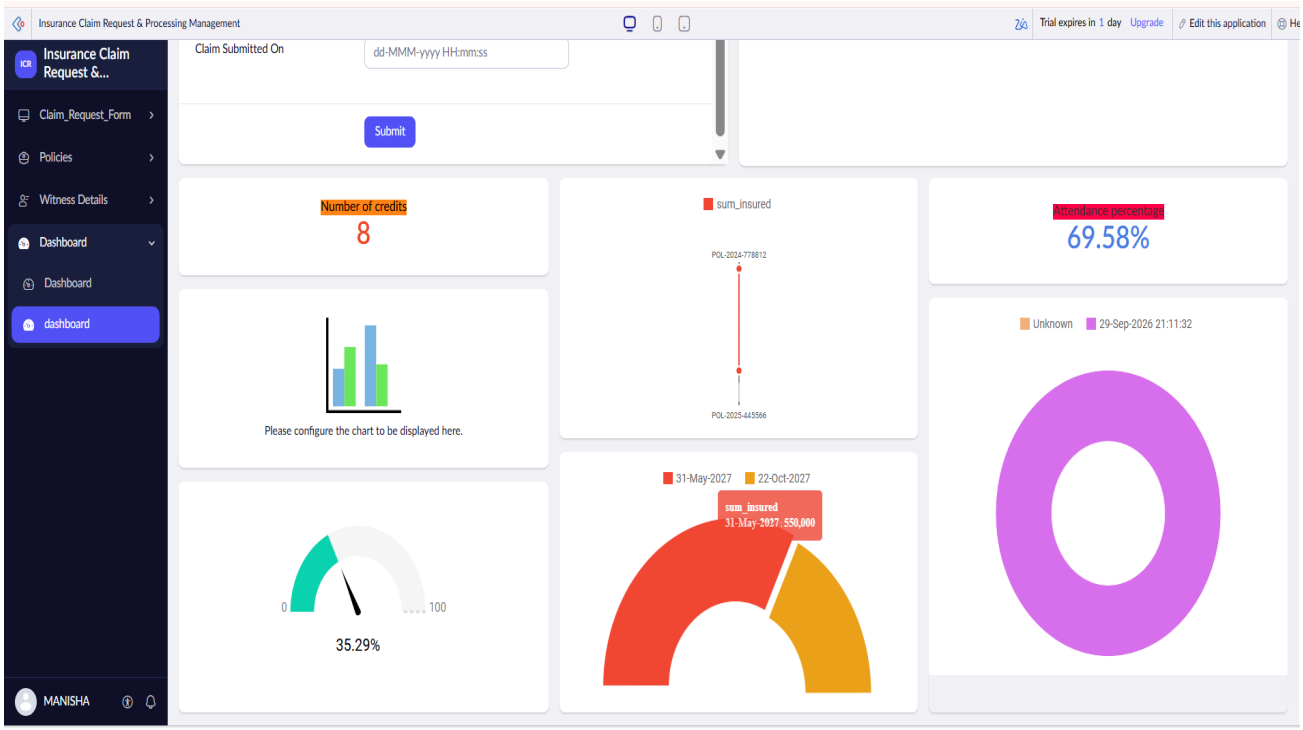

Procedure

1. Open the existing Insurance Claim Request & Processing Management application in Zoho Creator.
2. Create a new Page named Claims_Command_Center_Page.
3. Add a Panel named `dashboard` as the main container.
4. Add a Gauge to display monthly settlement progress.
5. Add a Chart to show claim distribution by claim type.
6. Add a Search element to search claims using claimant name, policy number, and claim reference ID.
7. Add a Button for sending document-reminder notifications.
8. Add a Board with the stages Submitted, Under Investigation, Approved, Settled, and Rejected.
9. Add a Report to display detailed claim records.
10. Add a Snippet containing claim-processing guidelines and required documents.
11. Add a Viewer to view uploaded claim documents such as FIR copies and repair estimates.
12. Add the Claim Request Form for quick claim intake.
13. Add Widgets to display surveyor availability and reserve-fund information.
14. Arrange all elements inside the main Panel according to the required command-center layout.
15. Test the page using sample claim data, including the Board drag-and-drop status change, Gauge, Chart, Search, and document Viewer.

Result

Thus, the dashboard was successfully designed in Zoho Creator using all eleven Page Builder elements, providing a single workspace for monitoring claims, searching records, updating claim status, viewing documents, and performing claim-processing activities.
